PROFILE

Flutter developer building production Android applications, working full-time at Devlix Technologies. Started in native Android with Java and MVVM, then moved to Flutter, where clean architecture and maintainable app structure became the focus. Ten applications shipped to the Google Play Store, most built end to end from requirement to release. Also teaches AI and machine learning part-time at XOKSIS.

EXPERIENCE

Flutter App Developer - Full-Time June 2026 - Present
Devlix Technologies

- Build and ship production Flutter applications end to end, from product requirement to Play Store release.
- Apply clean architecture, state management and dependency injection across the codebase.
- Integrate REST APIs and third-party services; optimise UI performance and responsiveness.
- Own feature development and ongoing improvements to live applications.

AI Engineer & AI/ML Instructor - Part-Time January 2026 - Present
XOKSIS

- Teach AI and Machine Learning concepts, LLM fundamentals and RAG pipeline architecture.
- Build practical AI features, RAG systems and automation pipelines for production use.
- Guide students through hands-on, job-oriented AI projects.

Mobile Application Developer March 2025 - August 2025
ETOS Way

- Built 5+ Flutter applications with AI-powered features.
- Worked with Firebase, REST APIs and GetX state management.
- Established clean architecture patterns and reusable UI systems.

Android Developer June 2024 - September 2024
BISM Software House

- Developed native Android applications using Firebase, Room and Android Jetpack.
- Applied MVVM architecture and asynchronous programming patterns.

TECHNICAL SKILLS

Mobile	Flutter · Dart · Android · Provider · GetX · Dependency Injection · Material Design
Architecture	Clean Architecture · MVVM · Repository Pattern · SOLID · State Management
AI / ML	LLMs · Prompt Engineering · RAG Pipelines · Agentic AI · Vector Databases · Curriculum Design
Backend	Firebase · REST APIs · Python · FastAPI · PostgreSQL · Authentication
Tools	Git & GitHub · Android Studio · VS Code · Docker · Play Console

PUBLISHED APPLICATIONS - GOOGLE PLAY

- Hide Photos & Videos** - Private vault with gallery lock for photos and video.
- Voice Changer** - On-device audio effects engine with instant playback.
- Football Wallpapers** - High-resolution wallpaper app with cached image browsing.
- 14 August Photo Editor** - Themed photo editor built around Pakistan's Independence Day.
- AI Grammar Checker** - Writing assistant with grammar correction (ETOS Way).
- Voice Notes** - Diary and memo recorder with local storage (ETOS Way).
- Status Saver** - Media downloader and manager (ETOS Way).
- GPS Land Area Calculator** - Map-based area measurement using Google Maps (ETOS Way).
