PROFILE

Flutter App Developer working full-time at Devlix Technologies, focused on building, improving and shipping production-ready mobile applications. My journey started with native Android and moved into Flutter, where I found my main focus: clean, responsive, user-friendly mobile experiences. Alongside that I work part-time as an AI Engineer and AI/ML Instructor, building LLM and RAG-powered systems and teaching the concepts behind them. 30+ apps built, 10+ on Google Play.

EXPERIENCE

Flutter App Developer · Full-Time June 2026 · Present
Devlix Technologies

- Build and ship production Flutter applications end to end, from product requirement to Play Store release.
- Apply clean architecture, state management and dependency injection across the codebase.
- Integrate REST APIs and third-party services; optimise UI performance and responsiveness.
- Own feature development and ongoing improvements to live applications.

AI Engineer & AI/ML Instructor · Part-Time January 2026 · Present
XOKSIS

- Teach AI and Machine Learning concepts, LLM fundamentals and RAG pipeline architecture.
- Build practical AI features, RAG systems and automation pipelines for production use.
- Guide students through hands-on, job-oriented AI projects.

Mobile Application Developer March 2025 · August 2025
ETOS Way

- Built 5+ Flutter applications with AI-powered features.
- Worked with Firebase, REST APIs and GetX state management.
- Established clean architecture patterns and reusable UI systems.

Android Developer June 2024 · September 2024
BISM Software House

- Developed native Android applications using Firebase, Room and Android Jetpack.
- Applied MVVM architecture and asynchronous programming patterns.

TECHNICAL SKILLS

Mobile	Flutter · Dart · Android · Firebase · GetX · Provider · Dependency Injection
Backend	Python · FastAPI · PostgreSQL · SQLAlchemy
AI / ML	LLMs · RAG · LangChain · LlamaIndex · CrewAI · LangGraph · Vector Databases · Embeddings
Development	Git · Docker · REST APIs · Clean Architecture · MVVM · Async Programming

PUBLISHED APPLICATIONS · GOOGLE PLAY

- **Football Wallpapers** · High-resolution football wallpaper app (Ronaldo, Messi, Neymar).
- **14 August Photo Editor** · Themed photo editor built around Pakistan's Independence Day.
- **Voice Changer** · Real-time voice effects and audio processing.
- **Hide Photos & Videos** · Private vault with gallery lock for photos and videos.

FEATURED PROJECT

YouTube AI Learning Assistant Side project
Python · FastAPI · LLMs · RAG · Vector DBs

- Turns a YouTube video into an interactive learning experience.
- Interactive Q&A over video content, AI quiz generation and flashcards for revision.
